

Care & Use of Your New Holster

- Wrap the holster belt around your waist with the pouch side of the holster away from your body and lock it into place with the plastic tabs.
- Loosen or tighten the belt so that it fits comfortably around your waist.
- Before you begin to massage your client, position your holster so that it is away from the table and out of your way.
- To retrieve oil or lotion, simply push on the pump of the bottle with your thumb so that oil or lotion will fall into your palm. For creme, just pull the tube from the holster and remove the amount you need. Place the tube back in the holster for easy access.
- Occasionally oil, lotion or creme will spill onto your holster. You can simply clean your holster with hot water and a clean cloth. You may put your holster in the washing machine when cleaning linens, but let the holster drip dry. *DO NOT dry your holster in the clothes dryer.*
- If you plan on traveling with your oil holster, remove the bottle from the holster and hold it over a sink. Push the spout down with your palm as you turn it clockwise. The spout should lock into place. To unlock, turn the spout counter-clockwise.
